About This Content

A new continent and numerous new tasks await you in Professional Famer 2014's America DLC. The vast new map takes the player to the amber waves of grain of North America – complete with huge fields and new buildings. Additional crops (e.g. potatoes) and dozens of new machines bring added variation to the ultimate farming experience. The improved field system calculates the yield of each field even more realistically – depending on soil quality, humidity, fertilization rate, varmints and other factors.

There's much more for a Professional Farmer to do as a deep and powerful farm simulation gets even better with this all new DLC!

Features

- New, huge map “America”
- New crops, e.g. potatoes
- A variety of new Machines to choose from - Pickup, potato planters, potato harvesters, forage harvesters, balers, mowers, manure spreaders and many more
- Extremely realistic field system provides variable yields depending on soil quality, humidity, fertilization rate and varmints

awesme game it is nice to have this game every one should have this one. I have enjoyed this game very much.I have never had a single problem with it.The only bugs i have seen is on one field where the crops disappear when turning around but reappear when on the field again.Another bug is with the front end load tractors that can't gain any speed.The maps are beautiful and the mechanics menu is superb.You can switch from morning to morning and season to season when your ready.The workers you don't see but you click on the field you want them to do and it's done.What's cool to me is that you can over flow your combine or trailer having it spill on the ground.The whole game to me is very good and allot of fun.So if you like farming with a difference then this is the one.. Interesting addition to Professional Farmer 2014. The description under About This Content says it all. Well worth purchasing!
